

SR-2000

Southeast Resins Drain Repair

SR-2000 Drain Repair Application Notes

The repair and rehabilitation of deteriorating drain areas can be addressed very effectively with the use of our SR-2000 Concrete/Asphalt Repair Systems. Damaged concrete or receding and sinking asphalt can be repaired with the same SR-2000 product with only the aggregate changing to achieve the desired appearance.

Below are several examples of the type repairs that can be done:

Surface Drain

Trench Drain

Curb/Street Drain
